## Year 7 printable 7th grade english worksheets

Subtraction is a key skill to learn for young students. But, it can be a challenging skill to master. Some children will require manipulatives such as number lines, counters, small blocks, pennies, or even candy such as gummies or M&Ms. Regardless of the manipulatives they might use, young students will need lots of practice to master any math skill. Use the following free printables, which provide subtraction problems up to the number 20, to help students get the practice they need. D.Russell Print the PDF: Worksheet No. 1 In this printable, students will learn basic math facts answering questions using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. Note that some of these problems do require borrowing, so be sure to review that skill before handing out the worksheets. D.Russell Print PDF: Worksheet No. 2 This printable gives students further practice solving subtraction problems using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. If students are struggling, use various manipulatives—pennies, small blocks, or even small pieces of candy. D.Russell Print the PDF: Worksheet No. 3 In this printable, students continue to answer subtraction questions using numbers up to 20 and noting their answers just below each problem. Take the opportunity, here, to go over a few of the problems on the board together with the entire class. Explain that borrowing and carrying in math are known as regrouping. D.Russell Print the PDF: Worksheet No. 4 In this printable, students continue to work basic subtraction problems and fill in their answers below each problem. Consider using pennies to teach the concept. Give each student 20 pennies; have them count out the number of pennies listed in the "minuend," the top number in a subtraction problem. Then, have them count out the number of pennies listed in the "subtrahend," the bottom number in a subtraction problem. This is a quick way to help students learn by counting real objects. D.Russell Print the PDF: Worksheet No. 5 Using this worksheet, teach subtraction skills by using gross-motor learning, where students actually stand up and walk around to learn the concept. If your class is large enough, have students stand at their desks. Count the number of students in the minuend, and have them come to the front of the room, such as "14." Then, count the number of students in the subtrahend—"6" in the case of one of the problems on the worksheet—and have them sit down. This provides a good visual way to show students that the answer to this subtraction problem would be eight. D.Russell Print the PDF: Worksheet No. 6 Before students begin to work the subtraction problems on this printable, explain to them that you'll give them one minute in which to work the problems. Offer a small prize to the student who gets the most answers correct within the timeframe. Then, start your stopwatch and let the student loose on the problems. Competition and deadlines can be good motivational tools for learning. D.Russell Print the PDF: Worksheet No. 7 To complete this worksheet, have students work independently. Give them a set time—perhaps five or 10 minutes—to complete the worksheet. Collect the worksheets, and when the students have gone home correct them. Use this kind of formative assessment to see how well students are mastering the concept, and adjust your strategies for teaching subtraction if needed. D.Russell Print the PDF: Worksheet No 8 In this printable, students will continue to learn basic math facts answering questions using numbers up to 20. Since the students have been practicing the skill for a while, use this and the subsequent worksheets as time-fillers. If students complete some other math work early, give them this worksheet to see how they perform. D.Russell Print the PDF: Worksheet No. 9 Consider assigning this printable as homework. Practicing basic math skills, such as subtraction and addition, is a good way for young students to master the concept. Tell students to use manipulative they might have at home, such as change, marbles, or small blocks, to help them complete the problems. D.Russell Print the PDF: Worksheet No. 10 As you wrap up your unit on subtracting numbers up to 20, have students complete this worksheet independently. Have students swap worksheets when they are done, and grade their neighbor's work as you post the answers on the board. This saves you hours of grading time after school. Collect the graded papers so you can see how well the students have mastered the concept. Find more math practice for your first graders with these word problem worksheets. Geography worksheets can be a valuable resource for teachers and students looking for activities and information related to both U.S. states and foreign countries. Each link leads you to a page featuring general background about the subject, whether it be countries like Germany and Japan, or states like Alaska and Nevada. The resources also include crossword puzzles, vocabulary worksheets, alphabet-ordering activities and explanations of geographical terms—such as isthmus, island and archipelago. Use these printables as study aids, pop quizzes or launching points for discussions about the various states and countries included here. Add these free printable geography worksheets to your homeschool day to reinforce geography skills and for variety and fun. Geography Germany Japan South America Improve your students' math skills and help them learn how to calculate fractions, percentages, and more with these word problems. The exercises are designed for students in the seventh grade, but anyone who wants to get better at math will find them useful. The sections below contain two-word problem worksheets for students, in section Nos. 1 and 3. For ease of grading, identical worksheets, including the answers, are printed in section Nos. 2 and 4. More detailed explanations of some of the problems are also provided within the sections. Find out what birthday cakes, grocery stores, and snowballs have in common with these fun word problems. Practice calculating fractions and percentages with problems such as: When the birthday cake was about to be served, you were told you could have 0.6, 60%, 3/5, or 6%. Which three of the choices will give you the same size portion? Explain to students that the correct answer is .6, 60%, and 3/5 because all of these equal 60 percent, or six out of 10, or 60 parts out of 100. By contrast, 6 percent means just that: only six pennies out of 100, six parts out of a 100, or six tiny slivers of cake out of 100. Find the solutions to the word problems that students tackled in the first math worksheet. The second problem, and answer, state: Problem: 4/7 of the birthday cake was eaten on your birthday. The next day your dad ate 1/2 of what was left. You get to finish the cake, how much is left? Answer: 3/14 If students are struggling, explain that they can easily find the answer by multiplying fractions as follows, where "C" stands for the portion of cake that is left. They first need to determine how much cake was left after the birthday Then they need to see what fraction was left the next day after dad gobbled up some more of the cake: C = 3/7 x 1/2 C = 3 x 1 / 7 x 2 C = 3 / 14 So 3/14 of the cake was left over after dad had a snack the next day. Have students learn how to calculate a rate of return and how to divide a large area into smaller lots with these math problems. To help students, go over the first problem as a class: Sam loves basketball and can sink the ball in the net 65% of the time. If he takes 30 shots, how many will he sink? Explain to students that they simply need to convert 65% to a decimal (0.65), and then multiply that number by 30. Find the solutions to the word problems students have tackled in the second math worksheet. For the first problem, demonstrate how to work out the solution if students are still having difficulty, where "S" equals shots made: So Sam made 19.5 shots. But since you can't make half a shot, Sam made 19 shots if you don't round up. Normally, you'd round up decimals five and greater to the next whole number, which would be 20 in this case. But in this rare case, you'd round down because, as noted, you can't make half a shot. These free English worksheets are a great way to test yourself to see if you're understanding the essential concepts of the English language. Below are dozens of free worksheets that you can print off or view on your computer to see just how well your learning is coming along. If you find these to be too difficult, consider taking free online English lessons and free English games to learn more about what's in these worksheets, and then come back and take a second look. There are also several free language learning mobile applications that can teach you English when you're away from your computer or free language learning websites and free language exchange websites that you can use when you are on your computer. Learning numbers may be the most basic thing you learn with any language. Download these free English worksheets to see how well you know the English words for various numbers. Not only can you use these worksheets to see if you can write the correct word for each number, but you can also compare the structure of each letter with the answers to verify that you're drawing them accurately. Numbers Crossword: Write the word for each given number, and then fill the words into the crossword puzzle. Answers aren't given, but you'll know if you're correct if when the puzzle has been solved. Count and Write Numbers: Count the number of objects in each picture, and then write that number as text below the image. Check your answers on the second page. Numbers 10 to 100 Multiple Choice Quiz: Circle the multiple choice text that matches each given number. The numbers range from 10 through 100. Write in Words: Express each number as words. These numbers are in the hundred thousands. Numbers 10 to 100 Handwriting Practice Sheet: Practice writing various numbers by tracing over the text. Number Maze: Help the Surfing Starfish! Draw a line start with 1 all the way through to number 20 in this number maze. Counting up to 100: Count and write the number of blocks in each question. As with any language, it's essential that you know the English alphabet. Below are worksheets you can fill out to test whether you're on track with the ordering and writing of the letters. Alphabet Antics: This worksheet has lots of questions regarding the English alphabet. You must write two letters that come before and after the given letters, as well as rearrange a sentence in alphabetical order. All the answers are shown on the second page of the PDF. Capital Letter Tracing: This is for students just learning the alphabet and has them trace the letters. The Alphabet: Match the pictures with the letters and then write to complete the words. The ABC in Pictures: There are 26 pictures here along with the words. This is a great reference for students. The Alphabet Card Game: This printable English worksheet has 24 alphabet cards along with instructions on how to play the card game that goes along with them. Download these free worksheets for different methods of verifying that you know your colors in English. Colors Picture Test: Match each color splash with the written word. Vocabulary Colors: Draw a line between the object and its color to practice reading these basic words. Colors Crossword: Translate the color into the English word for that color, and then fill the word in the crossword puzzle. There are lots of rules when it comes to building sentences in English. Below are several worksheets you can download to see how well you know some of the basic and more tricky ones alike. Verbs: Animal Action: You're given 20 verbs that you must use to fill in the incomplete sentences. The answers are on the second page. Allude Vs. Elude Worksheet: Fill in the blank in these 10 sentences, choosing either elude or allude. Answers are included. Using Commas: Read the sentences and place commas in the correct places. Compare your answers with the answer key to see how many you get right. A more difficult worksheet is also available. Who Vs. Whom Worksheet: Choosing between the pronouns who and whom can be tricky. See if you can spot which word goes in these sentences, and then verify if you're correct with the answers on the second page of the worksheet. Days of the Week: Answer the questions about the different days of the week, and then find those words in the word search. Missing Letters of Spring: 15 words are missing one or more of their letters. See if you can fill in the blanks, and then compare your answers with the upside down answer key on the bottom of the PDF file. Once you're finished with this one, you can find more of these missing letter worksheets on Cinco de Mayo, Mother's Day, Winter, Fall, 4th of July, and Summer. Writing Names: Rewrite the names using capital letters where they're necessary. The answer to the five questions is on the second page. Clothes Wordsearch: Find words that have to do with clothes in this puzzle. Feelings Picture Test: Read and match the facial expressions with the vocabulary word for a feeling. A or An: A worksheet that has a picture and the word spelled out. Does "a" or "an" come before the word?
