

Functional and Life Skills Curriculum for Individuals on the Autism Spectrum

Updated by Amy Moore Gaffney, M.A., CCC-SLP
January 2022

Teaching functional and life skills requires educators to determine the needs of each student and to prepare effectively for their future. Technology has added a new dimension to teaching functional and life skills. It is important to use curriculum and programs that are successful, and research based whenever possible.

Below is a listing of some examples of curriculum and programs that can be used to teach functional and life skills to individuals on the autism spectrum. In addition to these programs, please be aware that there are many other supplemental programs, books, strategies, and resources that are not included but are available. Many of these resources can be accessed by Indiana residents via the [Library at the Indiana Institute on Disability and Community](#). Inclusion on this list does not imply endorsement of any one program.
