Click on the image above to get your Arbor Day printable pack. How will you celebrate Arbor Day with children? Share your ideas in the comments below ☺ Arbor Day is an international holiday that promotes the appreciation of trees and their important value in our lives. This Arbor Day for Kids unit will provide a history of these holidays, worksheets, vocabulary and teaching activities for students. The first Arbor Day in the United States took place on April 10, 1872 in Nebraska. It was founded by J. Sterling Morton, who was a newspaper editor at the time. He and his wife were nature lovers, and Morton used his platform in the newspaper to share his love of trees. Nebraska was not a heavily wooded state; it is flat and open. He taught his readers about planting trees to prevent soil erosion, provide shade and use them as fuel and building materials. Morton convinced the State Board of Agriculture to holiday, which he called Arbor Day. He injected a small contest into the day by challenging counties and individuals to plant trees and offering prizes for those who planted the most. It is believed that more than a million trees were planted on this first Arbor Day in the USA Check out our printable Arbor Day poems, poems, Over the next decade, other states began celebrating Arbor Day. More than 30 years later, conservationists asked President Theodore Roosevelt to talk to public schoolchildren about conservation and forestry. Roosevelt agreed, and in 1907 he issued an Arbor Day Proclamation to the School Children of the United States on the importance of trees and that forestry deserves to be taught in U.S. schools. Arbor Day Around the World But Arbor Day hasn't started in America. For centuries, different cultures have been celebrating trees. In fact, the first known deciduous tree plantation festival took place in 1594 in the Spanish village of Mondoédo. And in 1805, the first modern Arbor Day event took place in the small Spanish village of Villanueva de la Sierra, when a local priest – Don Juan Abern Samtrés – planted the first tree with a large group of people from the community and then celebrated with a feast and other tree plantings that lasted three days. He then wrote letters encouraging nearby cities to do the same.----- Advertisement ----- Today, more than 40 countries around the world have Arbor Day celebrations. However, the date on which they celebrate it varies and depends on the season. Arbor Day activities for children Help your students better understand Arbor Day with these activities: Economics Wood is an important product that is the basis for thousands of other items. Invite your students to create a list of products that use wood or other tree products (think juice, leaves, bark, etc.). Encourage them to look around their homes, classrooms, and other places. Activities: Print out our tree product worksheet and give each student a copy. Let them write down their list and then compare each one. Older children can go a step further and research wood statistics for the United States. Social studies Did you know that the national tree of the United States is the oak? And each state also has its own state tree. Activity: Download our State Tree Worksheet and print copies for your students. Have them research to find out what the tree is of their official state. Or you can assign each student a different state and have them study to find out what the official state tree is for their assigned state.----- advertising ----- There are many different tree species that grow around the world. In fact, scientists have found that there are more than 60,000 tree species on the planet. Here in North America we have a little less than 1,400. Activity: Excursion! to go to your local park or nearby wooded area. Some classrooms even simply take their class outside to identify the tree species on their school grounds. Download our local tree ID activity sheet and print enough copies for each of your students. Give each student a copy and ask them choose different trees and identify them accurately by filling in their activity sheet. If a visible tree is not possible, we recommend collecting leaves and bringing them to the classroom for identification/vote. Read More: Here are some tree identification books you can order online or find in your local libraries: Arbor Day Vocabulary Worksheets
