Our numbers worksheets are a wonderful way for preschoolers to learn numbers 1 through 10. Each free worksheet contains the number, corresponding image, and the word for each number. They can be colored in as a fun learning activity. Please help us spread the word: Our Free Numbers Worksheets - Learn 1 to 10 What Free Numbers Worksheets Would You Like to See? Please let us know using our contact webpage, via email, or through our social media channels. It's Easy to Use Our Preschool Numbers Printables We want daycare providers, parents, teachers, and everyone else involved with early childhood education to have an easy time printing our numbers worksheets. This is why we created two different printing options. The first way is to download the PDF of the numbers worksheet and then print it using free software like Acrobat Reader. The Chrome and Safari web browsers have a PDF viewer plugin already installed so you can actually print the PDF version directly in those browsers. We recommend using the PDFs. The second and easiest way to get our preschool numbers worksheets into the hands of your students is by selecting the "Print" icon. This will take you to a page on our daycare website where you can printout the image version of the free worksheet. Our Preschool Number Worksheets will not only help your students with counting, but they will also help them build skills in number formations, writing the names of numbers, recognizing numbers and so much more! The 7 activities included on each preschool counting worksheet are coloring in the word name and number, coloring in the correct circle that match the number of images shown, tracing the number, coloring in the corresponding amount of images, coloring in all of the numbers that correspond to the page, and finally writing out the number name. There is more where that came from! Come check out our preschool Number of the Week Program or our Fine Motor Numbers Bundle.Your preschool students will practice writing numbers, counting, spelling, tracing, and number formations with this number 1 preschool numbers worksheet.Your preschool students will practice writing numbers, counting, spelling, tracing, and number formations with this number 2 preschool numbers worksheet.Your preschool students will practice writing numbers, counting, spelling, tracing, and number formations with this number 3 preschool numbers worksheet.These preschool counting worksheets are great for early finishers and homework packs, making them an asset to your classroom or homeschool.These preschool counting worksheets are great for early finishers and homework packs, making them an asset to your classroom or homeschool.These preschool counting worksheets are great for early finishers and homework packs, making them an asset to your classroom or homeschool.These preschool counting worksheets are great for early finishers and homework packs, making them an asset to your classroom or homeschool.These preschool counting worksheets are great for early finishers and homework packs, making them an asset to your classroom or homeschool.These FREE preschool number worksheets will guide your students through number formation, counting, tracing, and spelling. Number Counting Worksheets - Count And Write Numbers, Count The Objects Of Different Types, Count And Color Correct Number Of Objects Check out these worksheets to help your child learn number counting (1-10) in different ways using our free printable worksheets like count and write numbers, count the objects of different types, count and color the correct number of objects etc. Count and Write Count Objects of Different Types Count and Color the Correct Number of Objects Number Counting Worksheets - Count and Write Number Counting Worksheets - Count Objects of Different Types Number Counting Worksheets - Count and Color the Correct Number of Objects Tons of free number worksheets for kids! Check out our wide range of free printable number worksheets that are perfect for kids of different ages. We've got worksheets for tracing numbers, counting practice, number recognition, number patterns, color by number and much, much more! Find More Teaching Resources Contributed by Leanne Guenther Math Basics: Counting and number recognition worksheets are among the first math worksheets that preschool and kindergarten children will practice with. Number recognition is a building block to success in math. As preschool and kindergarten children start to recognize their numbers, it is natural for them to begin counting objects. Farm Themed Count the Groups Worksheets Count the groupsworksheet 1 Count the groupsworksheet 2 Count the groupsworksheet 3 Count the groupsworksheet 4 Count the Groups Worksheets Count the groupsworksheet 1 Count the groupsworksheet 2 Count the groupsworksheet 3 Count the groupsworksheet 4 Count and Trace Worksheets: Connect the Dots Worksheets Age Rating All children develop as individuals. Parents and caregivers should use the age ratings below as a general guideline, taking the abilities, temperament and interests of their children into account. Ages 4-5 Can complete without assistance. Age 3 Can complete with minimal assistance after directions are given. Age 2 Introduction to math concepts - can complete with adult assistance. Introduction Comparison activities develop an understanding of mathematical order. Pattern recognition activities require children to observe and continue patterns preparing them for learning to recognize numbers. Number recognition and counting activities prepare preschoolers for grade school level addition and subtraction exercises. If an aspect of a project is frustrating to the child, provide assistance - try to keep things fun. Sing songs, read stories or watch shows with a similar theme as the worksheet you chose to supplement the project - again focusing on extra activities that the child enjoys to help keep them motivated. Take breaks, when necessary. Choose a time of day when you and the child are relaxed. Provide rewards (verbal encouragement, gold stars on "chore chart" checklists or awards for tasks that have been mastered) and change up the rewards when needed. Don't underestimate the "reward value" of one-on-one time with a loved grown up! Ten minutes of "homework time" with daddy after work can become a special ritual for both father and child. Visit DLTK's Number Buddies for printable crafts, coloring pages, games, tracer pages and poems to supplement these color recognition worksheets.
