By Erica Bohrer

Tips!

1. Provide each student in your class with his/her own copy of the 120 chart by photocopying the black and white version. Model and direct for your students to color in the skip counting by two's numbers yellow. You can also model and direct for your students to circle the skip counting by five's numbers in blue. Have your students save these 120 charts in their desks. They can then refer back to these charts whenever needed.
2. Provide each student with a translucent bingo counting chip. He/she can use the chip to find a number on the 120 chart and mark it. This makes it much easier for the students to see the numbers which are 1 less, 1 more, 10 less, and 10 more!
